Tee Expansion Joint

Branch off a line that moves: the run telescopes to absorb thermal movement while the branch stays put — so settlement cannot tear the tee off the main.

Shell: Carbon Steel / Pipe: Plastic (PE/PPR/UPVC/PVC-M)

Carbon steel body provides high structural strength, suitable for both above-ground and buried installations. The EPDM gasket's pre-compression design ensures reliable initial seal on the smooth, low-compression-strength surface of plastic pipes.

Branch off a line that moves: the run telescopes to absorb thermal movement while the branch stays put — so settlement cannot tear the tee off the main.
