Shell: Carbon Steel / Pipe: Plastic (PE/PPR/UPVC/PVC-M)

Carbon steel body provides high structural strength, suitable for both above-ground and buried installations. The EPDM gasket's pre-compression design ensures reliable initial seal on the smooth, low-compression-strength surface of plastic pipes.

Terminate a bell-end PVC pipe onto anything flanged: the socket end slides over the bell, the flange face bolts to valves or equipment. A clean transition without solvent welding.
